Profile

As a results-oriented professional with over 8 years of experience data engineering, and DevOps across diverse financial and technical environments; also Adept at translating business needs into technical solutions and driving project success from initiation through to delivery in agile, I aim to contribute to high-impact projects in a forward-thinking organization.

Skills :

Agile : scrum, SAFe
Management : budget tracking, roadmap, project timelines.
Data : PL/SQL, MSSQL, Teradata, Partitioning, SSIS, ETL, Tableau Software, PowerBI, SSRS
Devops : Git/Git Flow, Ansible, Jenkins, CI/CD, XL Release, XL Deploy, Nexus, maven, SonarQube, IIS, Certificates, DNS, DSC, Powershell, Ubuntu, CentOS, scripting
Programming : C# .NET, Python, Javascript, REST

Employment History

Scrum master and Data analyst, BNP Paribas (FEBRUARY 2022 – PRESENT)

Member of COBALT team, which is a datavizualisation application of OFS (One Finance Service): accounting and extra-accounting data.

Project manager:

- Drafted key project deliverables, including Expressions of Need, Project Descriptions, financial summaries for investment committees, Safety & Risk Sheets, and Continuity plans.
- Managed project timelines, budgets, team resources, and identified risks, ensuring proactive mitigation strategies.
- Successfully closed projects, overseeing the commissioning of deliverables and completing end-of-project documentation.

Scrum master:

- Led the Scrum team to ensure optimal adherence to Scrum values, facilitating team meetings, resolving obstacles, and keeping the team aligned with project goals.
- Planned and conducted Scrum ceremonies, ensuring that the team was on track and meeting sprint objectives. (Team : 7members)

Data Analyst (Functional/Technical)

- Led workshops with users to define requirements and specifications for new dashboards.
- *Defined Costing and* developed dashboards using Tableau Software (Acccounting and extra accounting data), incorporating writeback extensions when needed.
- Followed the implementation of secure file transfers (CFT) using PGP encryption to send files from source applications to COBALT.
- Developed SQL scripts and SSIS packages to load data from source applications into the COBALT database.
- Managed Tableau Server content, ensuring proper administration of published content and user access rights.
- Produced detailed technical and functional documentation, followed production monitoring and user support.

Technical skills : MSSQL, SQL, partitioning, index, SSIS, stored procedures,Tableau Software, Powershell, Python, REST API, Git, Git flow, CFT, PGP, IIS, Jenkins, XLRelease, Ansible

Scrum master and DevOps consultant, Societe Generale Corporate and Investment Banking – SGCIB (JANUARY 2019 – JANUARY 2022)

Member of the Component Team, which is responsible of providing technical components to other teams of the tribe.

Scrum Master (SAFe)

- Led a Scrum team to ensure effective application of Scrum values, keeping the team aligned with project goals.

- Planned and conducted meetings, facilitated Scrum ceremonies, and proactively resolved conflicts and blocking points. (Team : 6members)

DevOps Consultant

- Managed Continuous Integration/Continuous Deployment (CI/CD) pipelines for approximately 30 feature applications.
- Maintained, debugged, and evolved CI/CD processes to ensure seamless application delivery and quality code.

Data Consultant

- Developed and maintained SQL Server Integration Services (SSIS) packages to transform and load data from various sources (files) into databases.

Technical skills : MSSQL, SQL, SSIS, IIS, Jenkins, XLDeploy, Ansible, DSC, Powershell, Git, Git flow, GitVersion, MsBuild, Keepass, Nexus

Technical/Functional Consultant , JSI Group, PARIS (SEPTEMBER 2016 — JANUARY 2019)

Scrum master

- Led a Scrum team to ensure effective application of Scrum values, keeping the team aligned with project goals. (Team : 7members)
